

Wind Cluster®
Creating Synergy

Instrumentation

January 2009

Wind Cluster offers a wide variety of sensors, transmitters, etc.:

- Pressure gauges and switches
- Temperature gauges and thermowells
- Level indicators and switches
- Flow switches
- Instrumentation tube fittings
- Needle valves and manifolds
- Diaphragm seals

In addition, the one-stop-shop of Wind Cluster offers:

- Digital gauges for pressure and vacuum measurement
- Piezoresistive as well as Smart Pressure transmitters
- Instruments for air velocity, moisture, humidity, and dewpoint measurement
- Gas detection and analysis solutions - portable and online
- Water analysis, density and concentration measurement - portable and online
- Level monitoring, controlling, tank gauging, and interface level solutions
- Monitors for opacity and dust measurement
- Rotameters and volumetric flowmeters
- Ultrasonic gas leak detection
- Solutions for process parameters measurement info by SMS technology

The above makes us clearly the customer's first choice and enables us to cater to the majority of their business needs.
